

ENVISION TAX AND ACCOUNTING TEAM NOTES:

Outsource Fractional Controller: \$150 per hour

Fractional controller is credentialled a financial accountant who provides part-time or contract accounting services to multiple businesses. They can help businesses access high-level financial management without the cost and commitment of a full-time controller.

A fractional controller's responsibilities can include:

- Overseeing finance operations
- Ensuring bills are paid
- Handling month-end close
- Producing financial statements
- Preparing monthly financial reports
- Ensuring the company follows generally accepted accounting principles
- Overseeing and managing the annual audit process
- Conducting internal audits
- Providing expert support during an external audit
- Suggesting business improvements
-

Fractional controllers can be a good option for businesses that don't need or can't afford a full-time controller. They can also be a good option for businesses that want to scale their financial expertise up or down based on their changing needs.
